

Relay Cabinet Kit for Model Railroads

www.eaelec.com

Made in Canada

WARNING

Note that these ARE NOT TOYS, AND ARE NOT INTENDED FOR USE BY CHILDREN UNDER AGE OF 14. These products are model railroad equipment and accessories intended for use by adults.

Introduction

A typical relay cabinet of the type found along Eastern Canadian railroads in the 1960s, 70s and 80s. The prototype dimensions are 92 inches wide by 90 inches deep with an overall height of 120 inches including the legs.

Instructions

Glue the roof of the cabinet to the base part using CA glue as shown below. After glue is dry spray paint the entire unit silver. Add weathering as shown on the left if desired.

The Prototype
